OVERALL RAC

RAC = Risk Assessment Code for the residual risk after controls: E (extremely high), H (high), M (medium), L (low). Severity: catastrophic, critical, moderate, negligible. Probability: frequent, likely, occasional, seldom, unlikely. Rate each step with the risk matrix your accepted plan uses. The overall RAC may not be lower than the highest step RAC.

#	Job steps (detailed enough that a reader knows how the work is done)	Potential hazards for this step	Controls (elimination, engineering, administrative, PPE)	RAC
